

P-Pal Co.Ltd. (Taiwan)  
Jiangsu Zhongsheng Leisure Products Co. Ltd. (China)

# (Company profile)

## Company profile:

P-Pal co.ltd. (Taiwan) is an investment company which has an investment in Jiangsu zhongsheng leisure products Co.Ltd (China) which is located in Huaian, Jiangsu province----the beloved premier Zhou Enlai's hometown.

Our company is a professional manufacturer of leisure furniture, which is solid in technical force and rich in outstanding talents and comprehensive technical staff. Our company has always pursued the principle ---“Quality is the life, Custom is the god” since our establishment. which we produce Outdoor and indoor use tables and chairs etc. ,have good quality and superior service, as a result of which, our products are widely recognized and trusted by our clients.

# (Company Installation)

## Company installation:

Our company has a great many servo injection molding machines ranging from 100 tons to 1200 tons, the latest gas assisted molding equipment. many sets of automatic tube processing equipment and a full set of automatic spraying equipment. And we also set up our own lab testing center.

## Company' s products' design, and development features:

Our company focuses on designing, developing and manufacturing newly multi-functional leisure products suitable for both indoor and outdoor use., through which, we provide fashionable, environmental-friendly, portable, durable, recyclable products for our domestic and foreign customers. Our products are suitable for various occasions. They are top choices for home, office, exhibition, hotel and public places etc.

30,000 square meters

# (Design & Development)

We have been dedicated for years to the development, designing and manufacture of ecotype multifunctional leisure products suitable for both indoor and outdoor uses.

Our Italian designers focus on the idea of low-carbon, environment protection, energy-saving and multifunction to create fashionable, environment-friendly, convenient and durable products for both home and abroad consumers.

All series of products are characterized with engineering plastic products features like resistance to acid and base, and being easy to clean. Besides, they are inflaming retarding, water-proof, foldable, and convenient to carry and store, which makes them a superior choice for houses, offices, exhibitions, hotels, public leisure places, etc.

Our products are sold all over the world, and win reputation from both home and abroad customers for our superior quality and sincere service.

# (Company certification)

## Our Strengths

We have already passed certifications as ISO9001, ISO14000 and CE etc. and have several independent intellectual properties. We are one of the strongly recommended enterprises by The Economic & Trade Commission of Huai'an City.

# Injection Mold vs. Blow Molded

## Injection Molded

## Blow Molded

Cut-Off View

Molded Process

After the mold tooling is closed, inside of mold is near vacuum so the melted resin is injected into the tooling to get the product shaped. This process must be assisted with high pressure.

After the mold tooling is closed, the melted resin flows into the tooling, then “blow” with hot air to make the products expanded into its shape. By this process, there need not pressure.

Material

**Polypropylene (PP)**

**Polyethylene (PE)**

# Injection Mold vs. Blow Molded

## Injection Molded

## Blow Molded

### Advantages in Injection Molded

**High density:** Due to its molded process and one layer structure, so it's more impact resistant: when dropped onto ground, there'll be no deformation.

**Short cycle time:** Due to its molded process, the cooling system can be added inside the tooling. Therefore, at production, products can be cooled to save cycling time so capacity is greater.

**IP Issue:** Will not be involved in Intellectual Property (patent) problem

### Disadvantages in Injection Molded

**Market share:** As it is a new process for folding table production, few customers know about this technology.

**Investment high:** Due to the complicated process, the equipment and tooling costs are much more higher.

**Low density:** Due to its molded process and two layer hollow structure, so it's less impact resistant: when dropped onto ground, the corner will be broken.

**Long cycle time:** Due to its molded process, the products have to be cooled down naturally, so the unit cycling time is much more longer than injection molded, which means less capacity

**IP Issue:** Will be involved in IP problem: being sued

**Market Share:** For years blow molded table exist in market so all customers know this process.

**Investment low:** The equipment and tooling costs are much less so it's affordable by most investor.

# (Our Goals)

## 1. Planning for 2018:

- 1) regulation of production and sales management
- 2) automatization of facilities
- 3) effective and appropriate employee allocation
- 4) further improvement of system and criterions
- 5) annual production value of over 50,000,000 CNY

## 2. Planning for 2019 : to achieve

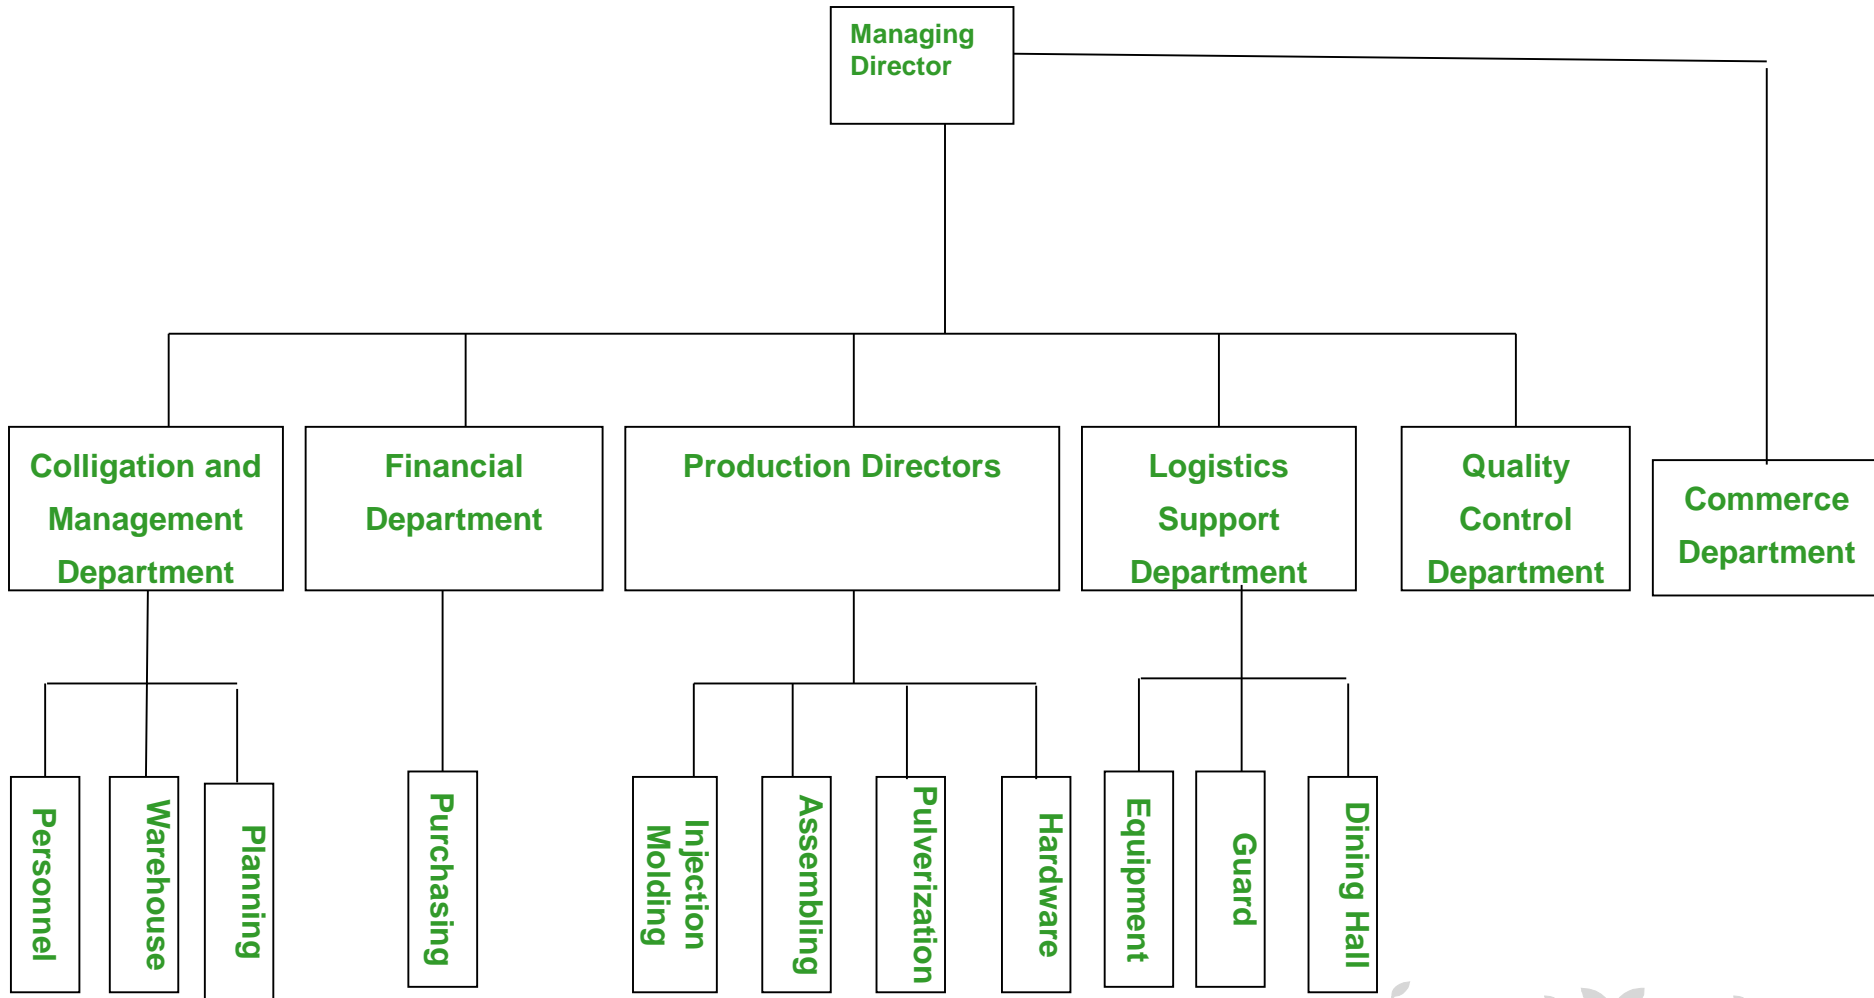

- 1) leading position in the industry regarding product quality
- 2) reduced energy consumption with automatization technique, based on high product quality
- 3) initial formation of unique corporate culture
- 4) basically appropriate allocation of facilities and other resources
- 5) annual production value of over 70,000,000 CNY

## 3. Planning for 2020 : to achieve

- 1) higher level of production capacity and quality
- 2) formation of good corporate culture
- 3) independent innovation, development and production of energy-saving and environment-friendly products
- 4) service and dedication to the society
- 5) annual production value of over 90,000,000 CNY
